RE: ML 47272A; DOGM Permit S/039/012  
Gunnison Quarry: T19S, R2E, S16, SE4NW4

Dear Mr. Haas,

This is in response to your letter of January 31, 2002. You may make application for an easement across state trust lands to access your Gunnison Quarry from the south by contacting Lou Brown in our Richfield Office. Mr. Brown's number is (435) 896-6494.

I understand that you intend to resume mining operations at your Gunnison Quarry, but that the quarry will not be expanded to disturb new surface until you first provide written notification. Such notification must describe in detail any plan or operation involving additional surface use or disturbances within the leasehold.

The Trust lands Administration will allow you to stockpile stone produced from the Gunnison Quarry at your Fayette Quarry provided there is a detailed accounting of such stone leaving the premises and a physical separation of the stockpiles produced from the two quarries.

You should also notify the Division of Oil, Gas & Mining to amend your mining permit with respect to any new access routes utilized or any additional acreage disturbed in conjunction with your mining operations.

Sincerely,

John T. Blake  
Mineral Resources Specialist

CC: Lou Brown
